

# SHEEP - Summer Feed Pellet

We are proud to be a part of growing regional Western Australia and value your support.

**Patmore Feeds' Summer Feed Pellet** is a 9mm pellet specifically designed and balanced to meet the complete nutritional requirements of sheep in Western Australian conditions including added Vitamin E and Selenium.

Available as a 9mm pellet, Patmore Feeds' Summer Feed Pellet is ideal for supplementary feeding during the dry summer months where feed on offer in the paddock is low and the goal is to maintain condition of mature sheep. The Summer Feed Pellet is an ideal alternative to grain feeding and should deliver a much better outcome for livestock. As this pellet contains no rumen modifiers it should only be fed on the trail in the paddock & not in confinement. This pellet should not be fed as the sole nutrition source to ewes in late pregnancy.

## TYPICAL ANALYSIS Dry Matter Basis

| Nutrient                           | Level         |
|------------------------------------|---------------|
| Energy (Ruminant ME)               | 10.0 MJ ME/kg |
| Crude Protein                      | 12.0%         |
| Urea                               | Nil           |
| Ionophore (eg Monensin, Lasalocid) | Nil           |

May contain one or more of the following: Cereal Grains, Lupins, Oat Hulls, Canola Products, Lime, Salt, Vitamin and Mineral Premix.
